## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method.

Group II, claim(s) 8-24, drawn to a labeling plant.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical features shared between the Groups do not make a contribution over the prior art and thus said common technical features do not qualify as special technical features. Evidence that the common technical features do not make a contribution over the prior art can be found in Heyne (US 4208237) and Douhery et al. (US 3767496).

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group A:

Species A1: wherein said fluid is steam

Species A2: wherein said fluid is hot air

Group B:

Species B1: wherein said support and transport device comprises steel cables

Species B2: wherein said support and transport device comprises grippers.

Group C:

Species C1: wherein said unit is movable relative to said plate

Species C2: wherein said unit is fixed relative to said plate

Applicant is required, in reply to this action, to elect a single species from **each of the above Groups** to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
